We are a group of friends, all from the mountain town of Åre in northern Sweden, who share a passion for an outdoors lifestyle.

Our weather changes as fast as a blink of an eye from extreme arctic sunlight to deep winter darkness, from heavy snow fall to fog and stormy rain. But hell, that doesn't stop us; it's part of the charm!

Our products are honest and straight forward in design, have a great fit and come in a range of awesome colors, but most of all, have an uncompromising quality that provides you with the highest level of reliable functionality.

We believe, that if you are like us, you enjoy the excitement and wonders of the outdoors, you want to experience new and exciting things and you would love nothing better than to share your adventures and experiences with your friends.

We brought all that to life under one brand built on the values we live and play by.

WE ARE SPEKTRUM!

# SPEKTRUM

Olof Larsson in Sunnmørealpene,  
Norway.

# G001

A stylish goggle flirting with retro esthetics in a contemporary way. The G001 does not make any compromise on functionality. The comfortable Tri-foam fit goes well with most helmets and the high contrast quality lens and wide line of sight will let you be aware of everything that comes your way on the mountain without any distortion.

## LARGE FIT SPHERICAL LENS

Frame Width: 180mm  
Lens Width: 176mm  
Frame Height: 101mm  
Lens Height: 89mm

## KEY FEATURES

- Bendable TPU frame
- Perfect fit Tri-density face foam
- Helmet compatible
- 100% UV protection
- Dual lens system
- Mirror or REVO finish on lens
- Air-flow lens system
- Anti-fog treatment
- Matte finish customized painting
- Nylon strap with jaquard stripe
- Gripper silicone at inside strap
- Hypalon label with metal logo
- Printed Spektrum logo on lens
- Spare lens included
- Microfiber goggle bag

a cylindrical lens"

Hanna Ovin in Åre, Sweden.

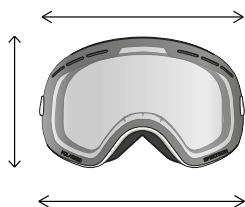

Jakob Wilhelmson in Åre Sweden.

## G004 POLARIZED

The G004 Polarized Edition is equipped with a UV-proof polarized lens that blocks annoying light glares from stealing precious focus from carving that pipe transition or hitting that icy in-run. On top of that, the comfort and functionality of this goggle is second to none. It comes with a complimentary spare lens that makes the G004 two goggles in one.

### MEDIUM FIT SPHERICAL LENS

Frame Width: 178mm  
Lens Width: 175mm  
Frame Height: 98mm

"A stylish and clean frame with  
polarized lenses"

Ruben Rosenfors in Kläppen,  
Sweden

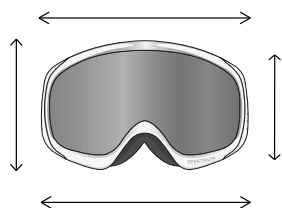

Rakel Rosenfors in Åre, Sweden.

# G006

Made for slightly smaller faces, the G006 is built with modern style and durable quality. The frame fits nicely with most helmets on the market and the Tri-foam gives smaller faces a comfortable fit. A top quality dual lens makes sure your visual perception is undistorted at all times and the anti-fog treatment will stand the test of any hike.

## SMALL FIT SPHERICAL LENS

Frame Width: 168mm  
Lens Width: 154mm  
Frame Height: 90mm  
Lens Height: 71mm

## KEY FEATURES

- Bendable TPU frame
- Perfect fit Tri-density face foam

Norway.

Ludvig Billtoft in Åre, Sweden.

# G007

Built for the most demanding riders out there, the G007 is designed and developed in our back yard at Åreskutan. It's a magic union of style and function. Our unique SnapSwitch function allows you to change your lens quick when the weather shifts and it will stay in place during powder wind mill tumbles. The cylincrical dual lens will keep your vision distorsion free and fit your face and helmet like a glove.

**LINE**

## BLACK LINE

The Black Line edition of our goggle is made for the brightest of days on high alpine glaciers. A polarized dark smoke lens shields you from hazardous rays and ice-glare. It's all encased in an all-black frame with matching strap. Built without compromise for the glacier but equally functional during bright winter days when your eyes need extra protection.

BACKMAN

Ingemar Backman in Svanstein,  
Sweden.

# INGEMAR

Art No: 1353  
**INGEMAR BACKMAN**  
 Solid Matte Finish  
 Lens: **Polarized Brown**  
 Extra Lens: Clear

Primarily made for shredding Japanese pow or ripping through artificially lit slopes at his home resort of Svanstein. Ingemars goggle is equipped with a polarized brown lens for medium to bright days. But it is the clear spare lens that is mounted in his goggles most of the season. Visually charged with Backman's career long companion -the Cosmos Cat- it comes in Ingemars favourite Prune color way.

We want to pay tribute to the man who brought snowboarding into the minds of the masses. Ingemar Backmans legendary backside air in Riksgränsen just over 20 years ago is one of the moments that has defined snowboarding and made it what it is today.

Ingemar and Spektrum has collaborated making a goggle based on our G004 model that ticks all the boxes in the Ingemar book of riding. Uncompromised fit and all the technical features you have come to expect from us is crowned with a signature strap and lens set-up that is focusing on flat-light powder days and artificially lit groomers. Just how Ingemar wants it.

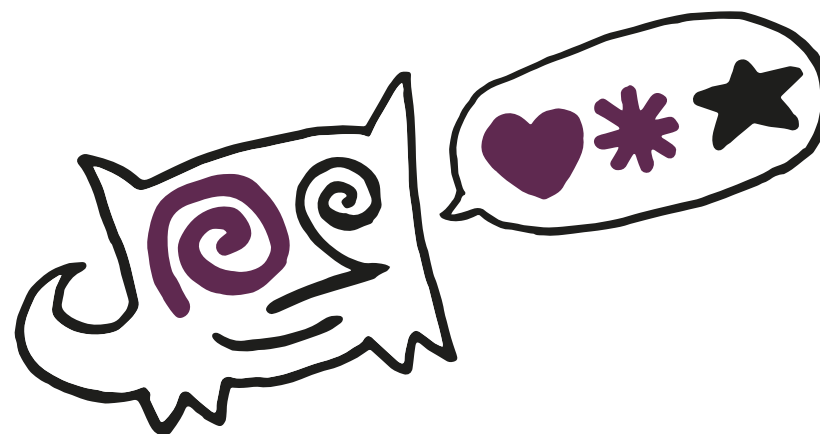

## LARGE FIT SPHERICAL LENS

HEART. SNOWFLAKE. STAR.

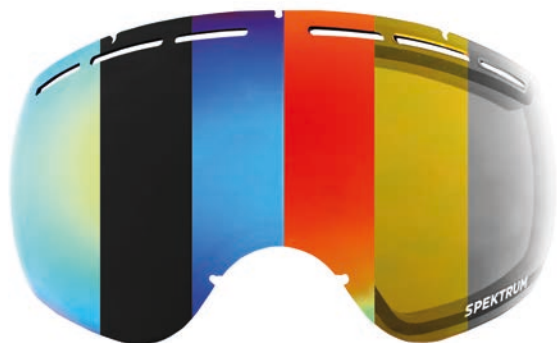

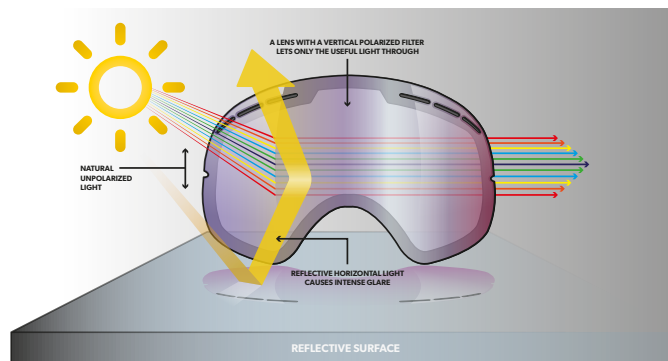

## LENS SELECTOR

### OPTIMIZED LENSES

Our optimized lenses are made out of high definition polycarbonate that extends the use of your goggles. These high quality materials combined with a wide visual perception will let you be aware of everything that comes your way on the mountain, without any distortion.

Spherical and cylindrical lenses with 100% UV protection, a dual lens system and top of the line anti-fog treatment, allows you to stay stoked on every mountain mission.

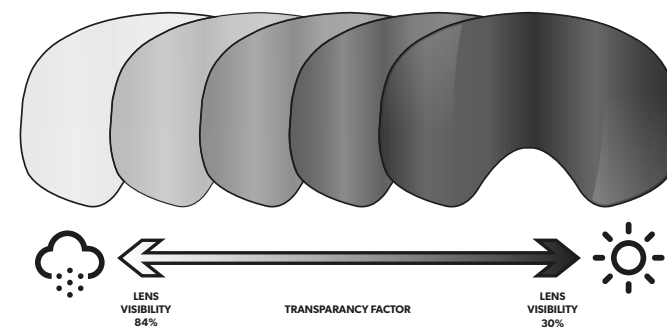

### POLARIZED LENSES

Light reflected from surfaces such as a ski slope or water is generally horizontally polarized. This means, instead of light being scattered in all directions in a more usual way, reflected light generally travels in a more horizontally oriented direction. This creates an annoying and sometimes dangerous intensity of light that we experience as glare.

Polarized lenses reduce glare reflected off ice, snow, water and other horizontal surfaces. Polarized lenses cut glare and haze, making your eyes more comfortable and allows you to see better.

\*With polarized lenses, you may be unable to read text on your cell phone or GPS device

### PHOTOCHROMIC LENSES

Photochromic lenses are optical lenses that change transparency depending on the current light condition. The photochromic lens darkens in more intense light conditions in order to protect your eyes. In low light conditions the lens becomes more clear. This reaction allows your eyes to have great vision in all light conditions.

Photochromic lenses remain 100% transparent to light without a ultraviolet component, such as artificial light. When exposed to ultraviolet (UV) rays, such as direct sunlight the molecules inside the lens undergo a chemical process that change the lens to a more dark color. This process limits the amount of uncomfortable rays to reach your eyes.

This process will keep your eyes comfortable and safe in all conditions, allowing to enjoy the mountains every day, all day!

## FRAME TECH

A bendable TPU frame to secure a sealed fit.

Snap switch lens changing system. (Featured on the G007)

Air-flow top mesh covered vents.

Perfect fit Tri-density face foam with fleece lining and large mesh covered vents.

Nylon strap with jacquard stripe and Alcantara label with metal logo.

Dual adjustable gripper silicone lined strap.

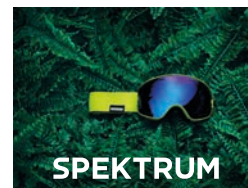

## POS

Big Top Section with five shelves. For mounting on slat walls or as stand alone piece. Can be combined with a bottom section.

Bottom section holds 28 goggles in packaging. To be combined with the Top Section.

Poster selection, can be ordered in custom sizes. Printed on 200g matte paper.

Small Top Section with two shelves. Fits both goggles and sunglasses. Can be mounted on a slat wall or used on a shop desk.

Our **POS** material is custom designed for Spektrum to fit all kind of shops. It has a wood base and stands solid on the ground or it can be mounted on the wall. Hand built in Sweden by dedicated craftsmen.
